

LEGGERO 001

Corten table

DESCRIPTION

The corten table designed by Giuseppe Pio D'Altilia for TrackDesign is the expression of a linear and rational design intuition, like the geometry to which the designer was inspired. Table Leggero exalts the beauty of the material and foresees a structure carried out with Corten steel sheets with minimum thicknesses. The designer aims to create the illusion that the support surface fluctuates, slightly, in space. In order to emphasize the industrial appearance of the furniture, there is a further variation with table-top in natural oak wood.

DETAILS

Designer	Giuseppe Pio D'Altilia
