

KANDINSKY 1923

Corten table

DESCRIPTION

The table is part of the series Kandinsky 1923. The furniture is inspired by the abstract painting by Vasiliji Kandinsjij Composition VIII. It's a work in which circles, triangles and lines create a dynamic geometric structure. The table is formed by parallelepipeds that connect and support two concentric circles of different sizes. From the same collection you can find out corten chairs. With its light and minimal lines, the Kandinsky 1923 collection is ideal for characterizing your indoor and outdoor environments.
