

## KANDINSKY 1923

### Corten chair

The chair is part of the Kandinskij 1923 series. These are furnitures inspired by the abstract painting by Vasiliji Kandinsjij Composition VIII. It is a work in which circles, triangles and lines create a dynamic geometric structure. The seat, with the back in the shape of a semicircle, is formed by parallelepipeds that connect and support an empty and a full circular shape. The chair is accompanied by \* cushions that incorporate some colors in the painting of Composition VIII. Available in various colors, the bright cushions are chosen to match and bring out the brown color of the corten. \* The cushions (diameter 44cm - height 8cm) can be configured in the dedicated section of the TrackDesign online shop.
