

HANAMI

Corten totem

Hanami ("watching the flowers") is the Japanese term giving the name to the collection of outdoor Corten furniture. The decorative theme characterizing furniture was inspired by the traditional oriental custom to enjoy the beauty of the spring cherry tree blossoming. The pattern, present on the structure surface, represents the flower petals offering harmonious plays of filled and empty spaces. The petals decorating the furniture remain protagonists also when the sofa is integrated with the linear cushions in water-repellent fabric. Matching the sofa, the collection proposes other furniture products, such as coffee tables, poufs and armchairs.
